

How To Change a Pick One - Multi Question into a Number - Multi Question

Problem

You have a **Pick One - Multi** question, such as:

How often do you drink...

	Never	Monthly	Weekly	Daily
Coke	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Pepsi	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Fanta	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

but you wish to analyse the data as if the question had been **Number - Multi**, so that you can compute average, such as:

How many times a year do you drink...

Coke	_____
Pepsi	_____
Fanta	_____

Steps to solve

1. On the **Tables** tab, right-click on one of the row headers and select **Duplicate Question**.
2. Enter a name for the new question which is descriptively accurate of what you want to achieve (e.g., *Number of times brand drunk per year*)
3. Right-click on one of the row headers of your newly created question and select **Values...**
4. Change the values in the **Value** column as appropriate. For example:
5. Press **OK**.
6. Press the  button to the right of the blue drop-down menu.
7. Change the **Question Type** to **Number - Multi**.
8. Click on the **Tables** tab to see the averages.

	Value	Label
1	NaN	Missing data
2	0	Never
3	12	Monthly
4	52	Weekly
5	365	Daily
